SUMMARY

BTech CS & AI student with hands-on experience in frontend and full-stack web development. Skilled in JavaScript, React.js, Tailwind CSS, Node.js, Python, PostgreSQL, MongoDB, and REST APIs. Experienced in building responsive web applications, integrating APIs, implementing CRUD workflows, and working with relational and NoSQL databases. Seeking an entry-level software development opportunity to contribute to real-world products and strengthen engineering skills.

EDUCATION

DAV University, Jalandhar — BTech CS & AI | Expected Graduation: June 2027

Pandit Jagat Ram Polytechnic / Punjab Technical University — Diploma in Computer Science Engineering

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, SQL, HTML5, CSS3

Frontend Development: React.js, Tailwind CSS, Responsive Web Design

Backend Development: Node.js, Express.js, Flask

Databases: PostgreSQL, MongoDB, SQLite

APIs & Development: REST APIs, API Integration, CRUD Operations, Authentication

Tools & Platforms: Git, GitHub, VS Code, DBeaver

Core Concepts: Object-Oriented Programming, Database Management, Data Structures & Algorithms, Software Design

PROJECTS

AI Interview Preparation System | React.js | JavaScript | Tailwind CSS | Node.js | Express.js | PostgreSQL

- Developed a web application for structured technical interview preparation with responsive question-management interfaces.
- Implemented authentication, role-based dashboards, subject/difficulty filtering, and REST API integration.
- Built CRUD workflows and Excel export functionality using PostgreSQL-backed data.

Smart Resume Scanner | HTML | CSS | Python

- Developed a resume analysis application that extracts resume content and evaluates skills and keywords against job requirements.
- Added job-title and job-description inputs with PDF/DOCX resume upload support and resume-to-job matching analysis.

Gyan Pargas Trust NGO Website | React | Tailwind CSS | Node.js | MongoDB Atlas

- Developed a responsive website presenting the organization's mission, projects, events, volunteering, donations, success stories, and social impact.
- Implemented structured content, contact information, galleries, event updates, and donation-focused sections.

Vyapar ERP Project | React | Tailwind CSS | Node.js | PostgreSQL

- Developed a business management system covering billing, inventory, accounting, sales, purchases, customers, vendors, and financial reporting.
- Designed workflows to reduce manual operations and provide organized information for business decision-making.

Banking System | HTML | CSS | JavaScript | Localhost

- Built a web-based banking simulation supporting account creation, authentication, deposits, withdrawals, transfers, balance inquiries, and transaction history.
- Implemented customer and administrator workflows with database-backed account and transaction records.

Smart Interview Coach | React | CSS | Node.js | PostgreSQL

- Developed an interview-preparation platform supporting question creation, editing, viewing, searching, and organization by subject and difficulty.
- Designed structured practice workflows for reviewing questions and model answers.

Student Management System | HTML | CSS | Python | Flask | SQLite3

- Developed a web application for managing student records, courses, attendance, marks, and academic reports.
- Implemented administrator CRUD operations and centralized academic information in SQLite.

ADDITIONAL INFORMATION

- Strong interest in software development, frontend development, and full-stack technologies.
- Continuously improving JavaScript, Python, SQL, React.js, and problem-solving skills.
- Interested in building responsive, scalable, and user-friendly web applications.
